# SKIN HEALTH FOR LIFE

## YOUR SKIN is the largest organ of your body.

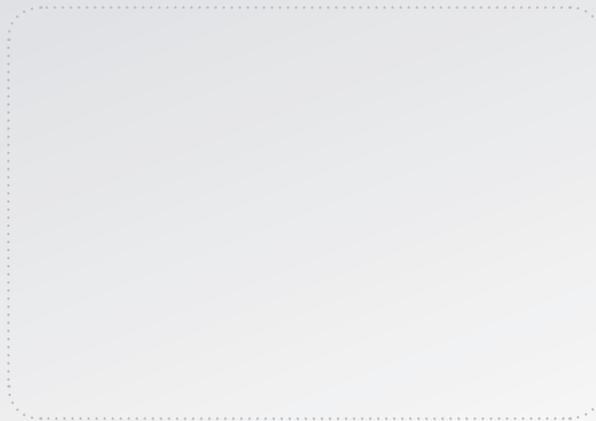

Every day, your skin is exposed to free radicals - unstable molecules that can be caused by factors such as pollution, sun and stress - which damage the skin cells that keep you looking fresh and young.

One of the most damaging causes of free radicals is the sun's rays. UVA rays have the same strength, every day, all year long.

Antioxidants counteract free radical damage by trapping and containing them, preventing further damage to skin cells.

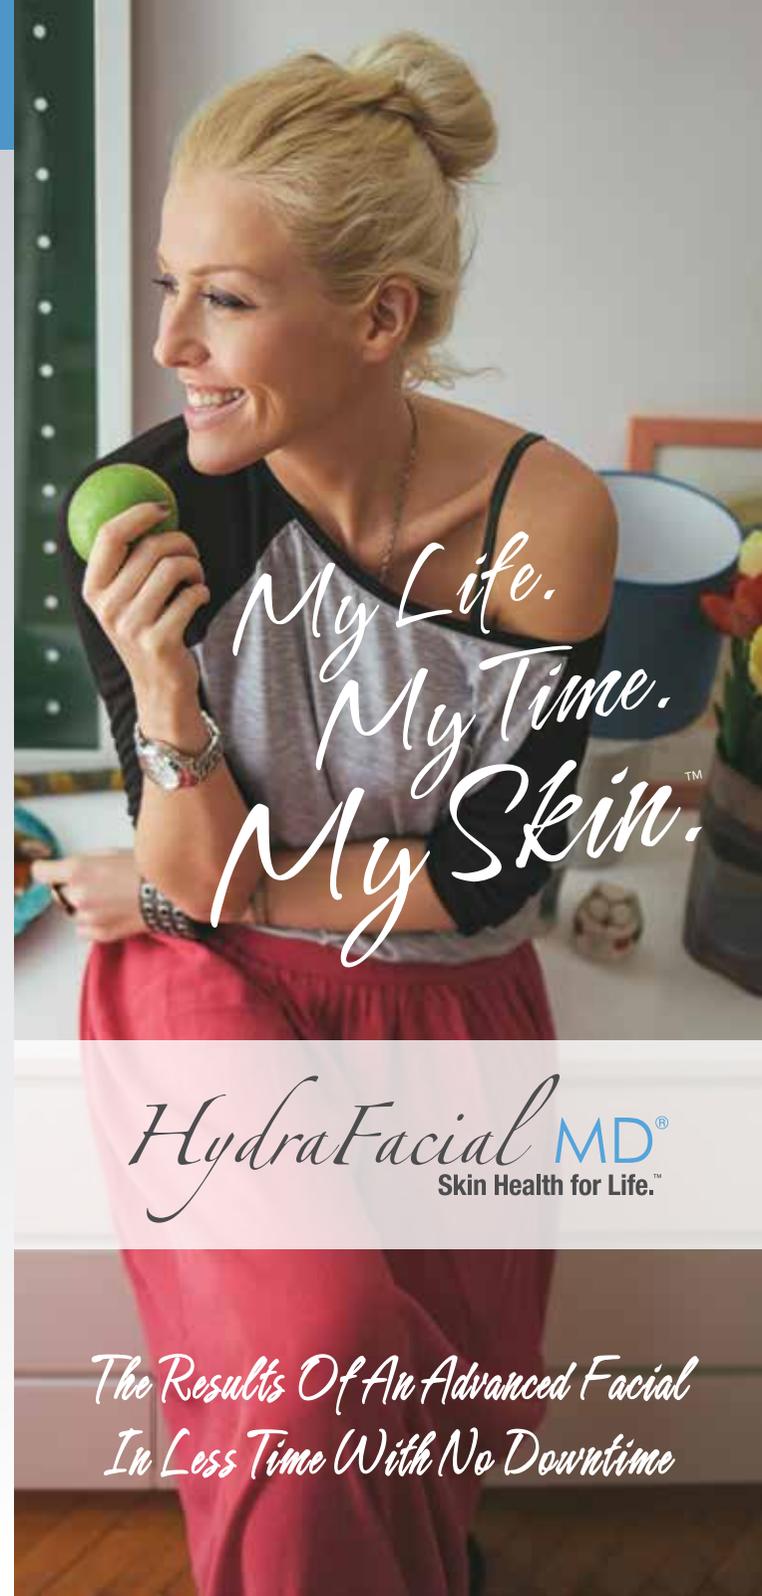

The HydraFacial utilises some of the most powerful antioxidants to revitalise and protect your skin.
