

Science. Results. Trust.

Science. Results. Trust.

“I never thought that my dark skin could undergo such a treatment, but the procedure was virtually painless and I saw a big difference right away. My skin was tighter, clearer and smoother.”

Syneron & Candela - two extraordinary brands, one global leader.

Syneron has a remarkable ability to innovate the newest technologies in aesthetic medicine.

Candela brings four decades of industry-leading scientific expertise.

Together, these two brands offer “gold standard” technologies for advanced aesthetic solutions.

Smooth Out the Lines of Time

Sublative Rejuvenation™ enables you to achieve a more youthful appearance.

This technology has been shown to effectively treat mild to moderate wrinkles, red and brown spots, and textural irregularities. This is truly the next generation of predictable and effective rejuvenation technology.

Energy is applied to the skin in a matrix. The healthy skin around the spots accelerates the healing process.

Skin after sublative rejuvenation.

How does sublative rejuvenation work?

RF energy is precisely directed the skin in the form of a matrix. Healthy skin around the dots accelerates the healing process of the skin. Post treatment, new collagen and healthy skin cells are produced. Mild to moderate wrinkles and superficial skin discolorations are reduced. The texture of your skin becomes more smooth and elastic.

Is sublative rejuvenation right for me?

Treatment is a predictable and effective solution for most skin types.

When can I expect to see results?

Typical treatment protocol is 3 treatments, 4-6 weeks apart. The total number of required treatment sessions depends on your skin's condition.

Does it hurt?

During treatment, many patients feel a warm, prickly sensation as energy enters their skin. After treatment a pink or red "sunburn" appearance is also common. Topical anesthetic ointments and cooling are used to reduce unpleasant feelings during treatment.
