Fractional CO2 Laser Resurfacing

The CO2 laser is the 'gold standard' of laser resurfacing to treat pigmentation, fine lines, deep wrinkles, skin sagging, textural irregularities, acne scarring (mild and severe) and severely sun damaged skin mainly for the face.

A CO2 laser treatment achieves results similar to a surgical procedure with marked improvement in the advanced signs of ageing. You will see a significant reduction in pigmentation, skin laxity, fine lines, and wrinkles.

Downtime for this treatment is 7-14 days. After the 1st week there will be a noticeable improvement in fine lines and pigment. You will notice over the next 4-6 months more improvement with skin tightening and reduction in deeper wrinkles due to the effect from the new collagen formation (neo-collagenesis).

This treatment must be performed by our Cosmetic Doctor. To arrange a FREE consultation please call or email the clinic.

CO2 laser only requires one treatment. Pre and post consultation with our Cosmetic Doctor are essential

VAMP BESPOKE TREATMENTS
(COMBINED LASER TREATMENTS)

Combining laser and other device based treatments effectively delivers two treatments in one giving you a more intensive treatment in one sitting at a lower price. Combined treatments can target the same problem. For example, combining radiofrequency treatments for more intensive skin rejuvenation, or they can target different problems. For example, lasers/IPL that target pigment and redness combined with skin rejuvenation devices for treatment of fine lines, wrinkles and skin laxity.
