

“This is the first time in over 15 years that I feel comfortable without having to wear makeup on my face. All my pigmentation problems have disappeared.”

D.E., Canada

Science. Results. Trust.

Syneron & Candela – two extraordinary brands, one global leader.

Syneron has a remarkable ability to innovate the newest technologies in aesthetic medicine.

Candela brings four decades of industry-leading scientific expertise.

Together, these two brands offer “gold standard” technologies for advanced aesthetic solutions.

elōs™

Skin Rejuvenation  
Pigmented & Vascular  
Lesion Treatment

# Effectively Restore Youthful, Healthy Looking Skin

Effectively and comfortably fade the appearance of skin imperfections caused by the sun, and uneven skin tones caused by brown and red spots (such as rosacea, spider veins and age spots).

We're proud to offer elōs™, the first and only technology that uses combined energies to effectively and gently restore and rejuvenate the appearance of your skin.

## How does skin rejuvenation with elōs work?

The combined bi-polar radio frequency and light energies of elōs technology precisely and predictably target pigmented lesions such as freckles, sun spots and age spots. Vascular lesions such as spider vessels and redness from rosacea are also lightened and gradually fade.

## Is skin rejuvenation with elōs right for me?

elōs is an effective treatment for most skin types.

## When can I expect to see results?

Gradual and cumulative improvement of skin tone is typically achieved in 5 treatment sessions. The total number of required treatment sessions depends on your skin's condition. Schedule a consultation to establish your personalised treatment schedule.

## Does it hurt?

Cooling of the skin surface ensures additional safety during treatment. This is a no-downtime procedure. Most patients return to normal activities immediately after treatment.

## Clinical Results
