

INJECTABLES

COSMETIC INJECTABLES

Cosmetic injectables are used to smooth facial lines and wrinkles, treat facial laxity (or sagging), restore lost volume to areas of the face that deplete as we age, and to create contours to enhance facial areas such as cheeks or jawline.

CONSULTATIONS

Client safety is our number 1 priority, followed by offering our clients the finest quality injectable treatments. We offer complimentary consultations with our cosmetic doctors to discuss your specific areas of concern, and treatment options. Our Doctors will conduct a full assessment and individualised treatment plan and quotation prior to treatment.

ANTI WRINKLE INJECTIONS

Australian Law prevents us from advertising the names of anti wrinkle injections

Treatment A

\$4 per unit

Treatment B

\$12 per unit

Anti wrinkle injections are used to smooth facial lines and wrinkles typically in the upper face – forehead lines, frown lines and 'crows feet'. More advanced techniques include treatment of the lower face and neck to prevent facial jowling.

COMMON TREATMENT AREAS

(all prices are estimates only)

A combination of these areas can be treated with anti-wrinkle injections for more complete facial rejuvenation.

FROWN LINES

Also known as number 11 lines which are the vertical lines between the eyebrows.

from \$160 to \$200

CROWS FEET

Lines around the outer corner of the eyes.

from \$160 to \$240

FOREHEAD LINES

The horizontal forehead creases.

from \$80 to \$200

BUNNY LINES

Lines across the bridge of the nose caused by crinkling the sides of the nose.

from \$80 to \$200

MENTAL CREASE

Horizontal lines on the chin.

from \$80 to \$200

VERTICAL LIP LINES

Commonly referred to as smoker's lines

price on consultation

GUMMY SMILE

Showing too much of the upper gum when smiling.

from \$40

EYE BROW LIFT

To help with eyelid hooding

from \$40

DROOPED CORNERS OF MOUTH

We can also use anti-wrinkle injections to lift the corners of the mouth which happens as we age.

Price on consultation

NEFERTITI LIFT

Treatment of the platysma muscles in the neck with anti-wrinkle injections to treat sagging jowls and neck bands. This treatment will also reduce the reappearance of sagging jowls with advancing age.

Price on consultation

BRUXISM (TEETH GRINDING)

Anti-wrinkle injections can be used very effectively to treat bruxism. They work by temporarily blocking nerve impulses to the masseter muscle effectively weakening the muscle. Treating this very same muscle also causes slimming of the lower face and is also a popular treatment for this reason. The effect generally lasts anywhere between 3 and 6 months and will depend on the dose given and previous treatments

From \$320

HYPERHYDROSIS (EXCESSIVE SWEATING)

Anti wrinkle injections may be used for treatment of hyperhydrosis (excessive sweating) of the armpits, hands feet face and head. It's done as a series of injections placed superficially in the skin. Sweat glands are stimulated by specific innervation and the product blocks neurological (mental) stimulation. Retreatment is necessary every 4-6 months.

Price \$1000 (underarms).

Price on consultation for other areas.

Ask about miraDry® for a more long term solution to excessive underarm sweat and odour.

DERMAL FILLERS

Our experienced Doctors have selected a diverse range of high quality dermal fillers to achieve natural long lasting results.

COMMON TREATMENT AREAS AND PRICING

A combination of these areas may be treated with dermal fillers for more complete facial rejuvenation.

CHEEKS (2ML) *from \$1,000*

As we age we lose volume in our cheeks due to loss of fat and bone reabsorption. Fillers can replace the lost volume in the cheeks and give a fuller more defined look. We can recreate the youthful V shape of the face. Adding volume to the cheeks also lifts the mid-face improving the nasolabial folds, those lines that run from the nose to the corners of the mouth.

TEAR TROUGHS *from \$600*

These are the hollow areas beneath the eyes. When we age we lose volume here which can cause shadowing giving the appearance of dark circles. Dermal fillers are injected here to replace volume and take away that tired look.

LIPS *from \$500*

Ageing causes loss of volume in the lips and some people genetically are born with small lips or asymmetrical lips. Dermal fillers are used to restore volume, enhance definition, and improve symmetry to create beautiful luscious lips.

MARIONETTE LINES *From \$500*

These lines run from the corners of the mouth to the chin and give people a constant sad or angry look. Dermal fillers can be injected to treat these lines.

ACCORDION LINES *from \$500*

Accordion lines or extended smile lines are the static lines present on the outer-side of the mouth, caused by smiling or laughing. Dermal fillers can be used to treat these lines too.

TEMPLES *from \$500*

Hollowing of the temples, another sign of ageing, can be treated with dermal fillers, restoring lost volume helping to create a more youthful appearance.

CHIN *From \$500*

Filler can be used in the chin to create a more defined chin or more proportionate face for those who have smaller chins or rounder faces. It can have a slimming effect for your face.

NON-SURGICAL NOSE RESHAPING \$1000

A procedure that uses dermal fillers to achieve a more desirable nose shape. Some reasons for considering this treatment include - flat bridge of the nose, crooked or off centered nose, a bump in the bridge or hook in the nose tip. A cannula is used for all treatments for increased client safety.

JAWLINE AND CHIN *from \$1000*

The ageing process leads to bone and soft tissue in the chin area dissolving, resulting in reduced structural support in the lower face. The muscles that are pulling your face up weaken and the muscles that pull your face down strengthen.

Dermal filler can replace this structural support and change the contours of your chin, making it appear more prominent with increased definition. Male and female treatments differ is that female clients tend to want a softer contoured chin, with male clients opting for a more 'chiseled' look. Both can be achieved with good injecting techniques and skilled aesthetic judgment

HAND REJUVENATION *price on consultation*

Dermal fillers are injected into the top surface of the hands increasing the volume of tissue on the hands. This treatment will address the majority of changes of the ageing hand. Veins and tendons will become less prominent, muscle wasting is disguised, skin texture and appearance is improved.

Dermal fillers may be combined with laser treatments for more complete hand rejuvenation.

DOUBLE CHIN DISSOLVING INJECTIONS

The first TGA approved non-surgical injectable treatment in Australia for treating double chins. These injections are an effective, safe and gradual treatment to dissolve under chin (submental) fat to reshape the jawline. The injections are suitable for men and women to sculpt the neck and create a 'chiseled' jawline. This treatment is often combined with dermal filler to improve the structure of the jaw and chin.

Results last for at least 4 years (based on available clinical data)

DOCTOR'S CONSULTATION Complimentary

PACK OF 2 TREATMENTS (Recommended) (2 vials) \$2400 (3 vials) \$3400

Note: Two treatments are required for treatment, additional product and/or treatments may be required depending on the size of the submental area

PER TREATMENT (2 vials) \$1400 (3 vials) \$1800

Additional single vial \$500
