

LASER HAIR REMOVAL

We offer the latest laser hair removal technology from Syneron Candela. Our laser treats light and darker skin types, faster and in fewer sessions. Client discretion and comfort are important to us. You may request the same Therapist each time you come for your appointment.

An average of 6-10 treatments is recommended for best results.

Laser hair removal should be easy so we've simplified our laser hair removal pricing. Simply select the area you'd like treated and arrange your appointment.

DEEP RADIOFREQUENCY (SKIN TIGHTENING & CONTOURING)

SYNERON CANDELA SUBLIME TREATMENT

Deep radiofrequency technology (RF) to tighten skin and contour the face. It works by heating the deeper layers of the skin stimulating collagen formation which tightens the skin.

The treatment of choice for mild to moderate skin laxity and preventing skin laxity or 'sagging'. This treatment is also recommended as an ongoing preventative treatment for skin wrinkling and sagging during the early stages of aging.

A course of 3 or more treatments are recommended for best results.

FRACTIONAL RADIOFREQUENCY (RF)

SYNERON CANDELA SUBLATIVE TREATMENT

A relatively non-invasive treatment delivering heat to target tissues while the outer layer of the skin (epidermis) remains relatively intact. It stimulates collagen resulting in improvement in textural irregularities such as fine lines and mild to moderate scarring. This is the treatment of choice for early acne scarring (<3 months). Active acne can also be treated with impressive results.

A course of 4 or more treatments are recommended for best results.

FRACTIONAL (CO2) LASER SKIN REJUVENATION SYNERON CANDELA CO2RE CO2 LASER

This treatment is considered 'semi surgical' and is only performed by our Cosmetic Doctors.

The treatment of choice for advanced signs of external ageing. The CO2 laser is the 'gold standard' of laser resurfacing to treat pigmentation, fine lines, deep wrinkles, skin sagging, textural irregularities, acne scarring (mild and severe) and severely sun damaged skin mainly for the face.

A CO2 laser treatment uses deep ablation to achieve results similar to a surgical procedure with marked improvement in the advanced signs of ageing. You will see a significant reduction in pigmentation, skin laxity, fine lines, and wrinkles after a single treatment.

Downtime for this treatment is 7-14 days. After the 1st week there will be a noticeable improvement in fine lines and pigment. You will notice over the next 4-6 months more improvement with skin tightening and reduction in deeper wrinkles due to the affect from new collagen formation (neo-collagenesis).

To arrange a complimentary consultation with our Doctor please contact the clinic.

FULL FACE \$4,000

Other areas may be treated e.g. neck and décolletage, on consultation with the Doctor.

The price Includes pre and post treatment consultations with the Doctor, post treatment care pack, Synergie Skin Daily Cosmeceuticals take home kit.

DEEP SKIN NEEDLING WITH RADIOFREQUENCY

SYNERON CANDELA PROFOUND TREATMENT

Profound is only performed by our Cosmetic Doctors

The latest technology to treat skin laxity (sagging) of the face and neck using deep skin needling and radiofrequency in a single treatment. This treatment has been shown to be particularly effective for the jawline and under chin areas.

Clinical data showed the result is 37% that of a surgical face lift. Individual results will vary.

Profound is unique because it's the only device on the market that measures the precise temperature of the deep layers of skin which is important to trigger the skins building blocks – elastin, collagen, and hyaluronic acid resulting in thickening and tightening of the skin treating deep wrinkles and sagging:

TREATMENT \$3,900 per treatment

MIRADRY

TREATMENT OF EXCESSIVE SWEATING (HYPERHYDROSIS) & ODOUR

The miraDry® procedure uses non-invasive technology that is safe and clinically proven to dramatically reduce underarm sweat AND odour in a single treatment with long lasting results.

The miraDry® System delivers precisely controlled thermal (heat) energy to the region where the underarm sweat and odour glands reside and eliminates these glands non-invasively. You can expect to see sweat reduction immediately with minimal downtime.

Clinical studies show an average of 82% sweat reduction after a single treatment.

SINGLE TREATMENT

\$2400

In approximately 10% of cases a second treatment may be desired at significantly discounted cost of \$1400
