

CO₂RE INTIMA LASER VAGINAL REJUVENATION

CO₂RE INTIMA LASER BY CANDELA MEDICAL

Performed exclusively by our Cosmetic Doctors.

A non-surgical vaginal rejuvenation treatment that uses CO₂ laser energy to treat some of the symptoms women typically suffer from following childbirth and during and after menopause.

CO₂RE Intima is TGA approved to treat symptoms associated with vulvovaginal atrophy such as – burning, itching, dryness, and laxity of the internal vaginal tissues. It is also used to treat the external appearance of the vagina e.g. skin laxity, oversized labia, discolouration, and may be helpful in treating urine leakage during stress.

Please refer to our website or call the clinic 02 4041 1514 for more information.
