

## POST TREATMENT CARE

Following your antiwrinkle treatment we recommend you adhere to the following recommendations. This will ensure the results of your treatment are optimal and help avoid unwanted side effects.

- Avoid applying pressure to the treated area for 24-48 hours after treatment.
- Do not massage the treated area for 24-48 hours after treatment. This includes avoiding facials, facial exfoliation waxing, laser treatment or any other activity that applies pressure to the treatment area.
- You will notice the effect of your treatment in 48-72 hours. The full effect of treatment takes 2 weeks.
- To reduce the risk of bruising and other unwanted side effects, avoid excessive alcohol for 24 hours after treatment.

## POSSIBLE MINOR SIDE EFFECTS

- You may notice small 'bumps' areas of swelling and pin-point bleeding following treatment at the injection sites. This is normal and will settle in a few hours.
- You may experience minor bruising at the injection sites. This is sometimes unavoidable and will settle in a few days.

*If you are unwell or concerned about any aspect of your treatment, please don't hesitate to contact the clinic so we may advise and support you.*
