

COSMETIC INJECTABLES

COSMETIC INJECTABLES

In recent years, cosmetic injectable treatments have gained unprecedented popularity for non-surgical facial rejuvenation. Cosmetic injectable treatments are used to smooth facial lines and wrinkles, restore lost volume to areas of the face that deplete as we age, and to create contours to facial areas such as cheeks, jawline and chin.

All treatments are performed by experienced doctors and registered nurses.

We use only the highest quality pharmaceuticals with proven safety profiles.

COMPLIMENTARY CONSULTATIONS

Consultations with our experienced team are complimentary with no obligation to proceed with treatment. A full facial assessment is performed and time is taken to discuss your specific areas of concern in order to develop an individualised treatment plan just for you. You may proceed with treatment on the day of consultation.

ANTIWRINKLE INJECTIONS

Antiwrinkle injections are used to smooth facial lines and wrinkles typically in the upper face – forehead, frown lines and ‘crows feet’. More advanced techniques include treatment of the lower face and neck and treatment of hyperhidrosis and bruxism (teeth grinding).

Australian law prevents us from advertising the names of our antiwrinkle treatments.

Treatment A **\$4.50 per unit**
Treatment B **\$13 per unit**

COMMON TREATMENT AREAS Antiwrinkle

FROWN LINES

Also known as number 11 lines which are the vertical lines between the eyebrows.

from \$180 to \$225

CROW'S FEET

Lines around the outer corner of the eyes.

from \$180 to \$270

FOREHEAD LINES

The horizontal forehead creases.

from \$90 to \$225

BUNNY LINES

Lines across the bridge of the nose caused by crinkling the sides of the nose.

from \$90 to \$225

MENTAL CREASE

Horizontal lines on the chin.

from \$90 to \$225

VERTICAL LIP LINES

Commonly referred to as smoker's lines.

price on consultation

GUMMY SMILE

Showing too much of the upper gum when smiling.

from \$135 (min charge)

EYEBROW LIFT

To help with eyelid hooding.

from \$135 (min charge)

ADVANCED TREATMENT AREAS Antiwrinkle

DROOPED CORNERS OF THE MOUTH

We can also use antiwrinkle injections to lift the corners of the mouth which happens as we age.

price on consultation

HYPERHYDROSIS (EXCESSIVE SWEATING)

Antiwrinkle injections may be used for treatments of excessive sweating of the underarms, hands, feet, face and head. It's done as a series of injections placed superficially in the skin. This blocks neurological stimulation of sweat glands. The treatment is highly effective in reducing sweating by 90-100%. Re-treatment is necessary every 4-6 months.

price \$1000 (underarms, price on consultation for other areas)

BRUXISM (TEETH GRINDING)

A highly effective treatment for treatment of teeth grinding. It works by blocking nerve impulses to the masseter muscle. Treating this muscle also results in slimming of the lower face. Re-treatment is required every 3-6 months. Longevity of the effect will depend on the dose administered and the number of previous treatments.

from \$450

NEFERTITI LIFT

A Nefertiti Lift is the treatment of the platysma muscles in the neck with anti-wrinkle injections to treat sagging jowls and neck bands. This treatment will also reduce the reappearance of sagging jowls with advancing age.

price on consultation

DERMAL FILLERS

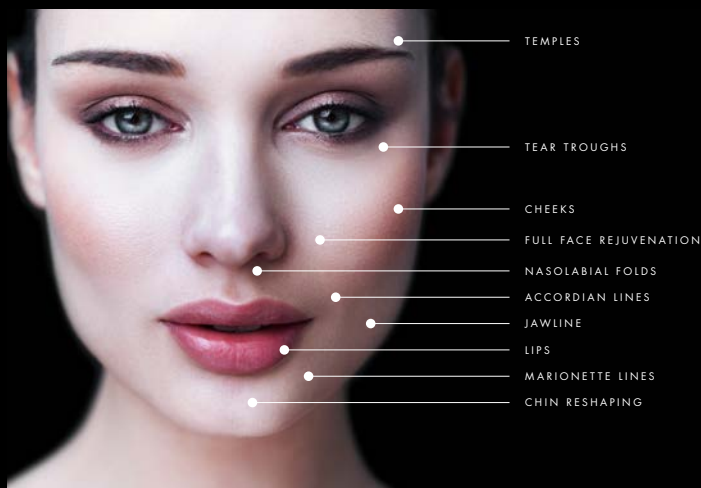

Dermal fillers are a gel-based cosmetic treatment injected into the skin to soften creases and folds, reduce the appearance of wrinkles, and increase or restore volume to the face for a more rejuvenated and youthful shape. We use only the highest quality fillers, skilfully placed to achieve natural, balanced facial rejuvenation.

We stock an extensive range of dermal fillers suitable for all facial areas.

DERMAL FILLERS (*per 1ml*)

\$600 - \$700

We offer customised dermal filler packages, refer to page 34 for details.

COMMON TREATMENT AREAS Dermal filler

A combination of these areas can be treated with dermal fillers for more complete facial rejuvenation. For specialist advice and a treatment plan tailored to you, talk to us about your specific areas of concern. Quotes for treatment are provided on consultation, prior to proceeding with treatment.

CHEEKS

As we age, we lose volume in our cheeks due to loss of fat and bone reabsorption. Fillers can replace the lost volume in the cheeks and give a fuller, more defined look. We can recreate the youthful V shape of the face. Adding volume to the cheeks also lifts the mid-face improving the nasolabial folds, the lines that run from the nose to the corners of the mouth.

MARIONETTE LINES

These lines run from the corners of the mouth to the chin and give people a constant sad or angry look. Fillers can be injected to treat these.

TEAR TROUGHS

These are the hollow areas beneath the eyes. When we age we lose volume here which can then cause shadowing which gives the appearance of dark circles. Dermal fillers are injected here to replace volume and take away that tired look.

LIPS

Ageing causes loss of volume in the lips and some people genetically are born with small lips or asymmetrical lips. Dermal fillers are used to restore volume, enhance definition, and improve symmetry.

ADVANCED TREATMENT AREAS Dermal filler

ACCORDION LINES

Dermal fillers can be used to treat accordion lines or extended smile lines. These are static lines present on the outer-side of the mouth, caused by smiling or laughing.

TEMPLES

Hollowing of the temples, another sign of ageing, can be treated with dermal fillers, restoring lost volume helping to create a more youthful appearance.

CHIN

Filler can be used in the chin to create a more defined chin or to create a more proportionate face for those who have smaller chins or rounder faces. It can have a slimming effect for your face.

JAWLINE

Dermal fillers are used for improved structure and shape of the jawline. Different techniques are used for men who typically want a more defined jawline where women seek structure and softer curves.

FULL FACIAL REJUVENATION

Dermal filler is skilfully placed using the latest injecting techniques to restore lost volume, lift sagging skin and create soft, structured curves for overall facial rejuvenation.

SKIN BOOSTERS

HYDRATING MICRO-FILLER INJECTIONS

Skin boosters or micro-fillers are a 'thin' dermal filler that are injected into the superficial layers of the skin for improvement in hydration, skin tone and elasticity, and softening of fine lines and wrinkles. Skin boosters absorb water and stimulate production of collagen and elastin resulting in firmer, softer, hydrated skin.

USED TO TREAT: Dry skin, collagen & elastin stimulation for thinning skin, uneven skin texture, fine lines.

MINT (PDO) THREAD LIFT

MINT PDO THREADS

Long biodegradable filaments coated in a stimulatory material (PDO – polydioxanone) are inserted under the skin to lift and tighten skin tissue of the face.

We offer an innovative thread lift treatment with insertion of 12-16 MINT long threads for a more dramatic, long-lasting lift. You will see immediate results with continued improvement over 4-12 weeks.

MINT thread lift is moderately invasive and is performed by our experienced Doctors. Expect results to last 12-18 months. Individual results vary.

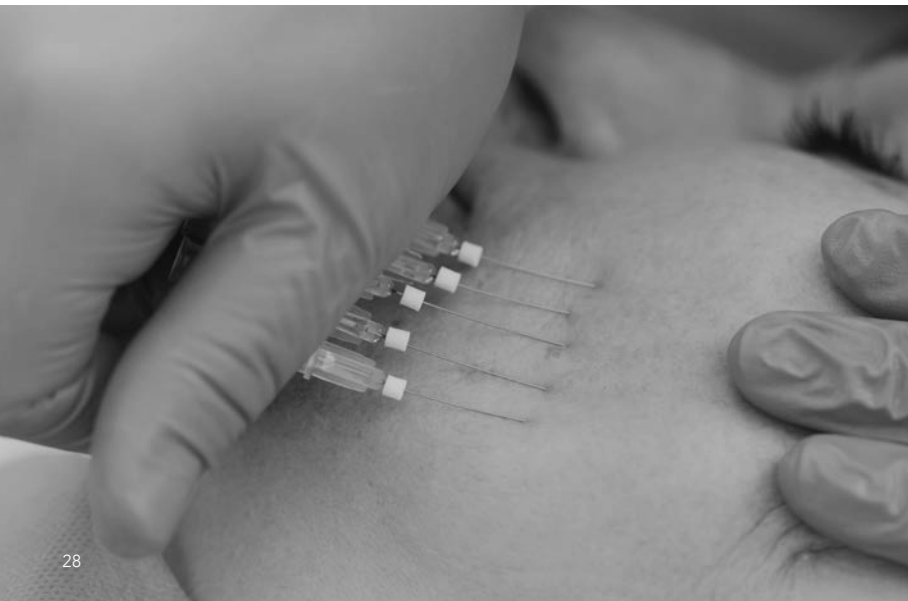

● **USED TO: Reposition and tighten skin of the face by lifting skin tissue, stimulating collagen and contraction of fat tissue.**

FULL MINT THREAD LIFT TREATMENT

3600

Price includes:

- Consultation with our cosmetic doctor
- Placement of 12-16 x MINT PDO long threads
- Additional threads if required are priced at \$200-\$400 per thread
- Post care pack

MONO (PDO) THREADS

MATRIX PDO MONO THREADS

Short biodegradable filaments coated in a stimulatory material (PDO – polydioxanone), inserted under the skin to stimulate collagen and elastin to firm and smooth fine lines, wrinkles and ‘crepey’ skin on the face and neck.

Ideal for rejuvenating the skin without adding volume or ‘bulk’ to the treated area. Often paired with dermal filler treatment and skin boosters for more extensive rejuvenation.

Mono threads are minimally invasive and are performed by our experienced doctors and registered nurses.

USED TO TREAT: Thinning skin, fine lines, improvement in overall skin quality, lower eye rejuvenation
