MINT (PDO) THREAD LIFT

MINT PDO THREADS

MINT™
Minimally Invasive Nonsurgical Thread

Our thread lift treatment uses long, biodegradable filaments coated with PDO (polydioxanone) to lift and tighten facial tissue.

We use 4-16 MINT long threads for a more dramatic, long-lasting lift. Results are visible immediately, with further improvement over 4-12 weeks as collagen production increases.

MINT thread lift is moderately invasive and is performed by our experienced Doctors. Expect results to last 12-18 months. Individual results vary.

USED TO: Reposition and tighten skin of the face by lifting skin tissue, stimulating collagen and contraction of fat tissue.

4 THREADS	**1600**
8 THREADS	**2400**
12 THREADS	**3000**
FULL MINT THREAD LIFT TREATMENT (16 THREADS)	**3600**
