MIRADRY

TREATMENT OF EXCESSIVE SWEATING (HYPERHYDROSIS) & ODOUR

miraDry®
A lasting solution for excessive underarm sweat

The miraDry® procedure is a non-invasive, clinically proven treatment that dramatically reduces underarm sweat and odour with long-lasting results. It is currently the only non-surgical solution offering permanent reduction of excessive underarm sweating.

Using precisely controlled thermal energy, miraDry® targets and eliminates sweat and odour glands safely, with most patients seeing results immediately. One treatment is often enough, though some patients require a second session. Expected downtime is just 1–2 days..

USED TO TREAT: Underarm (only) Hyperhydrosis

Requires consultation with our miraDry therapist prior to proceeding with treatment.
