COLLAGEN STIMULATING TREATMENTS

COLLAGEN STIMULATING TREATMENTS

Innovative TGA approved treatments that over time stimulate collagen and elastin, treating the visible signs of volume loss and improving the skin's elasticity and firmness. Collagen stimulators are one of the leading treatments in regenerative cosmetic medicine. They work by harnessing the body's natural ability to regenerate and repair itself, resulting in a more natural look.

We offer the full range of TGA approved collagen stimulating treatments. Collagen stimulators may be used to treat the face, eyes, neck, hands and décolletage.

Australian law prevents us from mentioning the names of collagen stimulating treatments. For more information, contact the clinic 02 4041 1514 or email info@vampcosmeticclinic.com.au

A course of treatments is recommended for optimum results.

Package pricing is available.
