NON SURGICAL TREATMENTS

NON-SURGICAL TREATMENTS

Non-surgical treatments have become increasingly popular for refreshing and enhancing the face without surgery. These treatments smooth lines and wrinkles, improve skin quality, restore lost volume, and create natural contours in areas like the cheeks, jawline, and chin.

All procedures are performed by experienced doctors and registered nurses using only premium products with proven safety profiles.

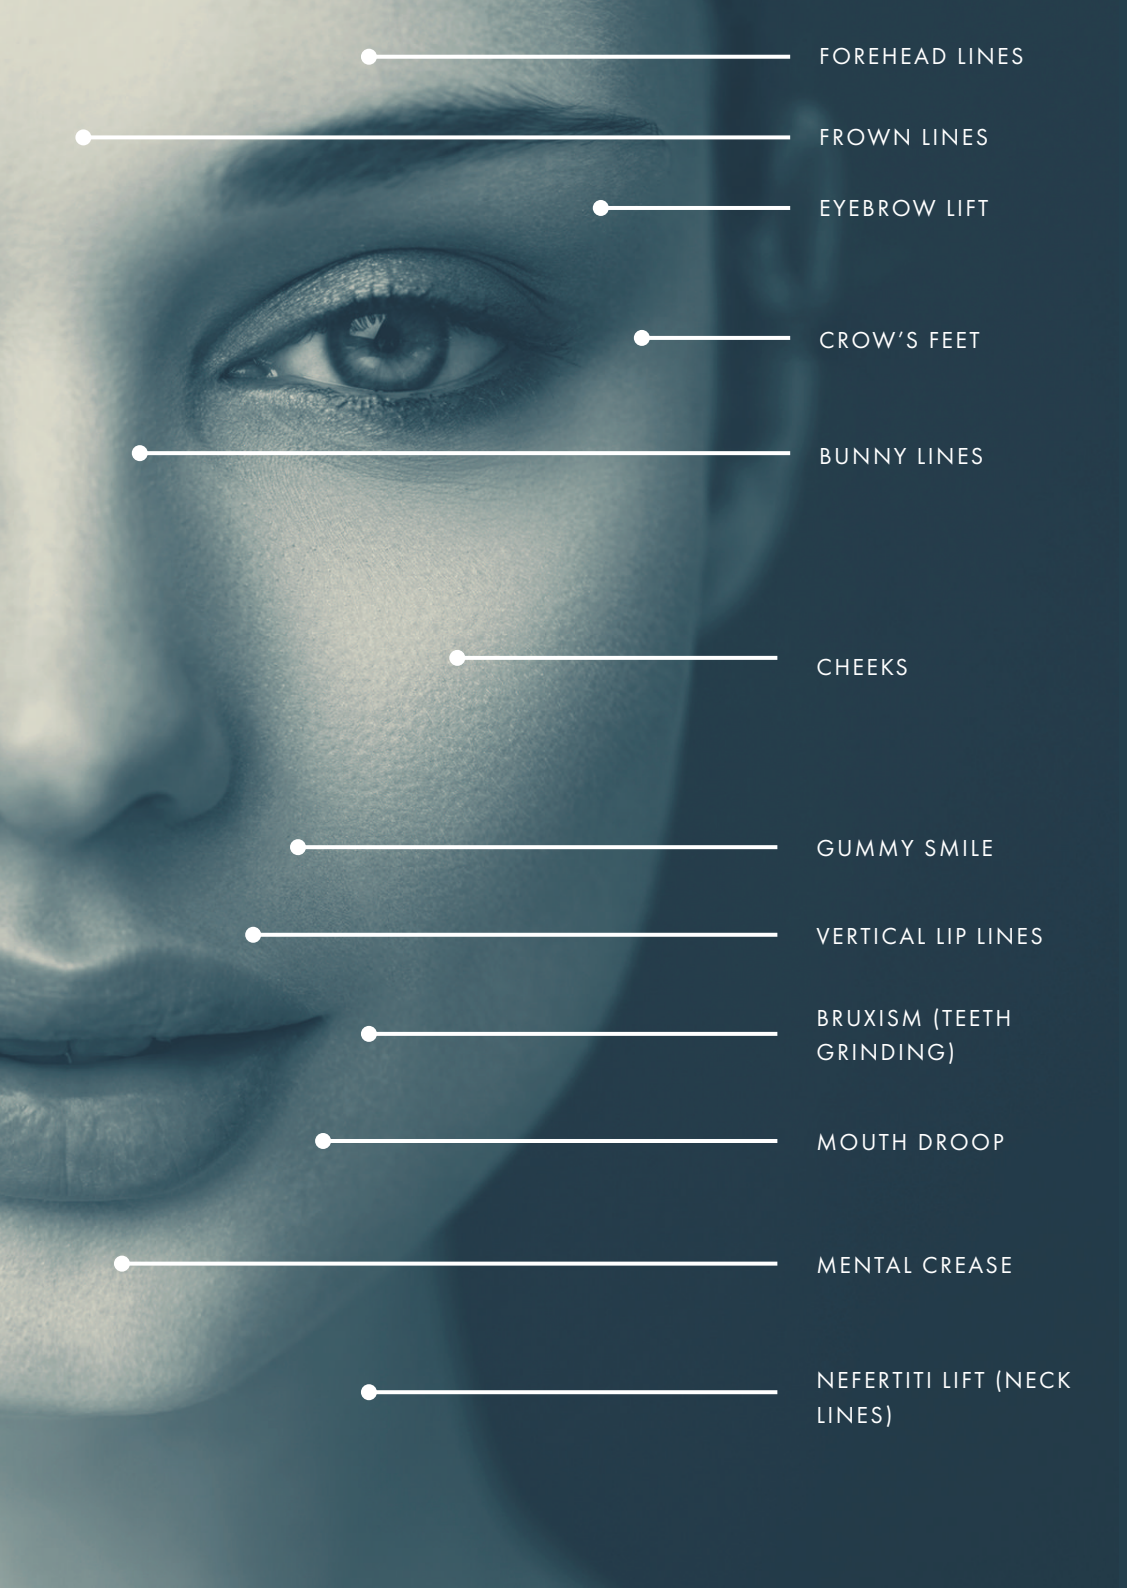
COMPLIMENTARY CONSULTATION

We offer complimentary, no-obligation consultations with our experienced team. We take the time to listen to your concerns and work with you to create a personalised treatment plan. If you wish, treatment can often be performed on the same day.

ANTI-WRINKLE TREATMENTS

Anti-wrinkle treatments smooth facial lines and wrinkles, commonly in the forehead, frown lines, and crow's feet. Advanced techniques can also treat the lower face, neck, excessive sweating (hyperhidrosis), and teeth grinding (bruxism) for a refreshed, youthful look.

Treatment A:	5 per unit
Treatmeant B:	15 per unit



COMMON TREATMENT AREAS

FROWN LINES

Also known as number 11 lines which are the vertical lines between the eyebrows.

Price: 200 to 250

MENTAL CREASE

Horizontal lines on the chin.

Price: 100 to 250*

CROW'S FEET

Lines around the outer corner of the eyes.

Price: 200 to 300

VERTICAL LIP LINES

Commonly referred to as smoker's lines.

Price: On consultation

FOREHEAD LINES

Lines around the outer corner of the eyes.

Price: 100 to 250*

GUMMY SMILE

Showing too much of the upper gum.

Price: From 150 (min charge)

BUNNY LINES

Lines across the bridge of the nose caused by crinkling the sides of the nose.

Price: 90 to 225*

EYEBROW LIFT

To help with eyelid hooding.

Price: From 150 (min charge)

*NOTE: minimum spend for antiwrinkle treatments is 150

ADVANCED TREATMENT AREAS

DROOPED CORNERS OF THE MOUTH

We can also use antiwrinkle treatments to lift the corners of the mouth which can droop as we age.

Price: On consultation

HYPERHYDROSIS (EXCESSIVE SWEATING)

Anti-wrinkle treatments may be used to treat excessive sweating of the underarms, hands, feet, face, and scalp. They work by blocking neurological stimulation of sweat glands and are highly effective, reducing sweating by 90–100%. Re-treatment is usually required every 4–6 months.

Price: On consultation

BRUXISM (TEETH GRINDING)

A highly effective treatment for teeth grinding. It works by blocking nerve impulses to the masseter muscle. Treating this muscle also results in slimming of the lower face. Re-treatment is required every 3–6 months. Longevity of the effect will depend on the dose administered and the number of previous treatments.

Price: From 500

NEFERTITI LIFT

A Nefertiti Lift is the treatment of the platysma muscles in the neck with anti-wrinkle injections to treat sagging jowls and neck bands. This treatment will also reduce the reappearance of sagging jowls with advancing age.

Price: On consultation

VOLUMISING TREATMENTS

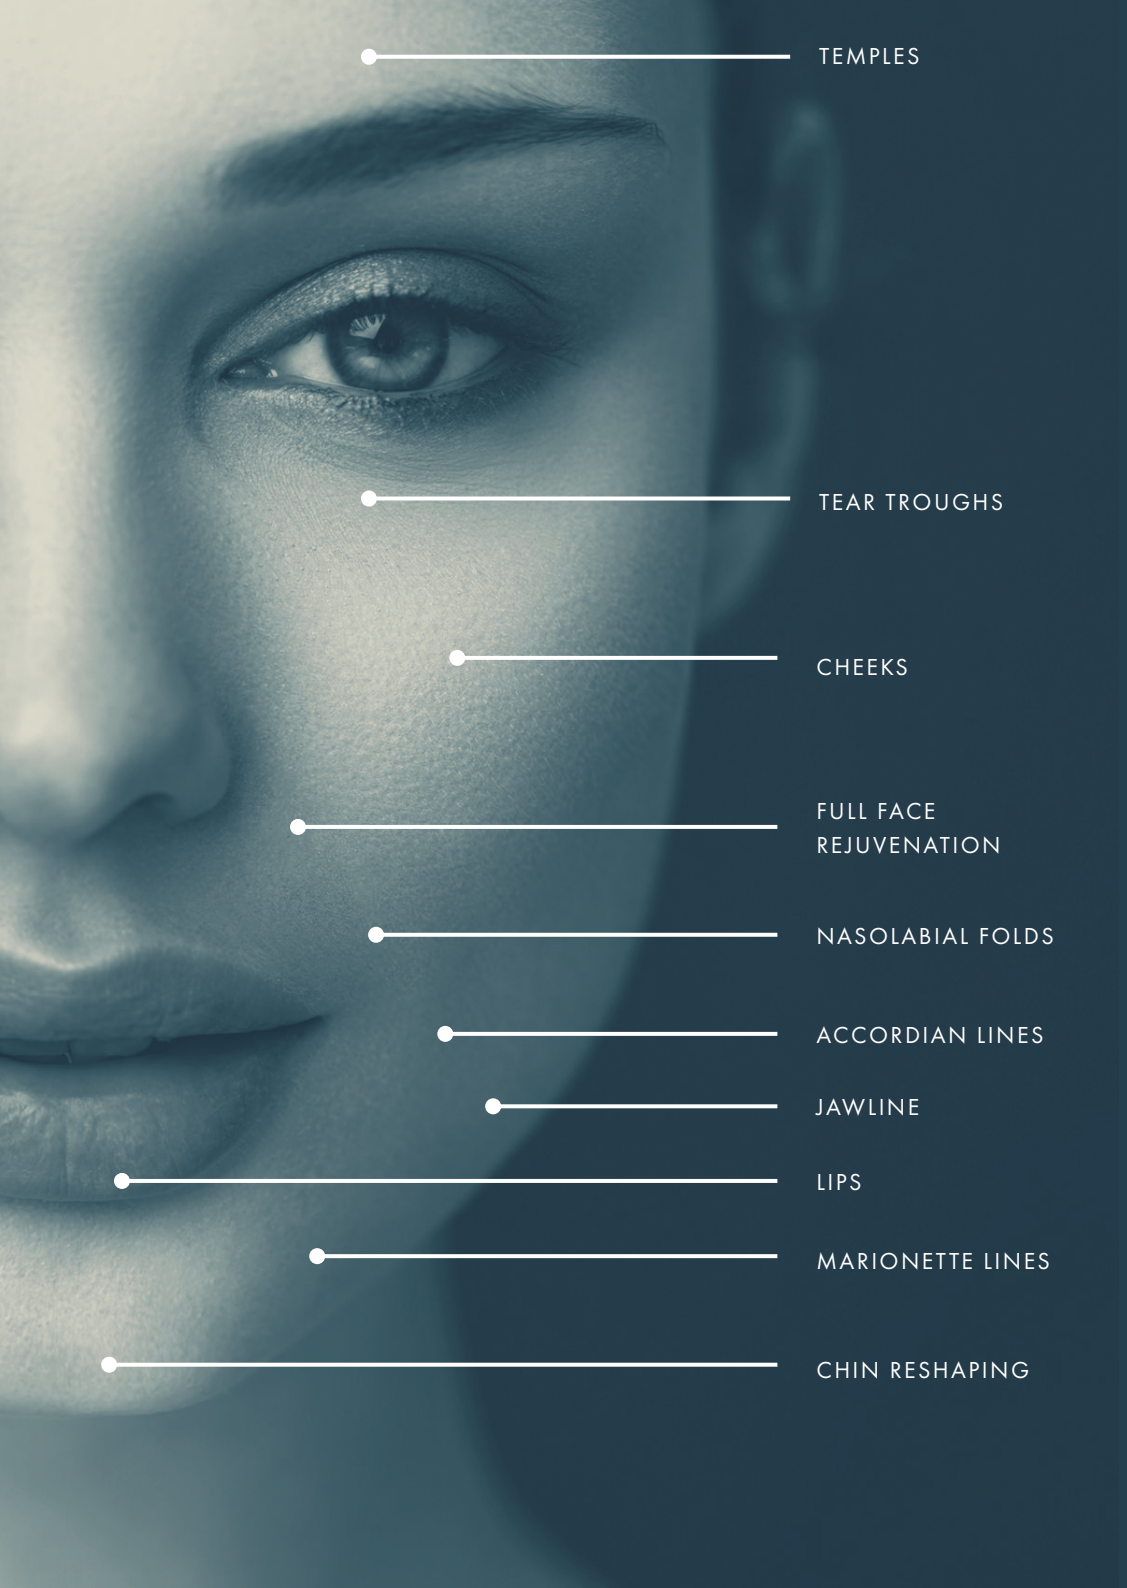
Recommended to soften lines and folds, smooth wrinkles, and restore facial volume for a refreshed, youthful look. Treatments are skilfully performed to achieve natural, balanced rejuvenation using our extensive range of premium products suitable for all facial areas.

Used to Treat:
Enlarged pores, uneven skin texture, skin clarity, mild pigmentation, maintenance treatment following intensive laser skin rejuvenation.

Price: From $650 - $700

Downtime: ●○○○○○○○○○

Discomfort: ●●○○○○○○○○



COMMON TREATMENT AREAS

VOLUMISING TREATMENTS

A combination of these areas can be treated with volumising treatments for more complete facial rejuvenation. For specialist advice and a personalised treatment plan, talk to us about your specific concerns. Quotes are provided during consultation before proceeding with treatment.

CHEEKS

As we age, we naturally lose volume in our cheeks due to fat loss and bone reabsorption. Volumising treatments can restore fullness to the cheeks, recreating the youthful V-shape of the face. Adding volume to the cheeks also lifts the midface, softening nasolabial folds – the lines that run from the nose to the corners of the mouth – for a more rejuvenated appearance.

MARIONETTE LINES

These lines run from the corners of the mouth to the chin and can create a constant sad or tired appearance. Volumising treatments can soften and lift these lines for a more refreshed, youthful look.

TEAR TROUGHS

These are the hollow areas beneath the eyes where volume loss over time can create shadows and the appearance of dark circles. Volumising treatments can restore lost volume, reducing shadowing and refreshing the under-eye area for a less tired, more rejuvenated look.

LIPS

Volumising treatments can restore age-related volume loss in the lips, enhance lip size and definition, and improve overall symmetry for a naturally balanced look.

ADVANCED TREATMENT AREAS

VOLUMISING TREATMENTS

ACCORDIAN LINES

Volumising treatments can soften accordion lines, also known as extended smile lines. These static lines form on the outer sides of the mouth from years of smiling or laughing.

TEMPLES

Age-related hollowing of the temples can be restored with volumising treatments, helping to rebalance facial proportions and create a more youthful appearance.

CHIN

Volumising treatments in the chin can add definition, improve facial balance, and even create a slimming effect for those with smaller chins or rounder faces.

JAWLINE

Volumising treatments can enhance the shape and structure of the jawline. Techniques are tailored for each patient – men often seek a stronger, more defined jawline, while women typically prefer structure with softer, balanced curves.

FULL FACIAL REJUVENATION

Using the latest techniques, volumising treatments are skilfully placed to restore lost volume, lift sagging skin, and create soft, natural contours for complete facial rejuvenation.

MINT (PDO) THREAD LIFT

MINT PDO THREADS

Our thread lift treatment uses long, biodegradable filaments coated with PDO (polydioxanone) to lift and tighten facial tissue. We use 4–16 MINT long threads for a more dramatic, long-lasting lift. Results are visible immediately, with further improvement over 4–12 weeks as collagen production increases. MINT thread lift is moderately invasive and performed by our experienced doctors. Expect results to last 12–18 months. Individual results vary.

Downtime: ●●●●●●●●○○

Discomfort: ●●●●●●●●○○

PRICING	SINGLE
4 THREADS	1600
8 THREADS	2400
12 THREADS	3000
FULL MINT THREAD LIFT TREATMENT (16 THREADS)	3600
